

nantoNite[®]

Sustainable technologies for marine coatings

Dealing with corrosion though respecting the environment will not be a problem anymore.

nantoNite[®] is Nanto Cleantech powder additive for solvent-based and water-based protective coatings perfectly suitable for purposes as durability, barrier to oxygen and water and outstanding reinforcement and anticorrosion.

Less coating need, increased barrier effects and a reduction of hazardous materials, Nanto Cleantech additives based on patented proprietary functionalized nantoClay[®] are the green and cost-effective solution for improved performances of the coating.

Technology patented in 55 countries
Ref. n. WO2010/064274
